### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lock See Yu-Jahnes on 9-2-2004.

The application has been amended as follows:

Claim 42: line 3, replace "at least" with – any --;

Claim 43: line 3, replace "at least" with – any --;

Claim 44: line 3, replace "at least" with – any --;

Claim 45: line 3, replace "at least" with – any --;

### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance: The present invention relates to the archiving of image data .

The prior art of record in combination or alone fails to teach or suggest these elements of independent claims 1, 18, 19, 39, 40, 41 in combination with other elements. For example independent claim 1 has claim limitations such as a position calculator for determining the position of the speaker and the position of the person at whom the speaker is looking; and a camera selector for selecting image data from the received image data on the basis of the determined positions of the speaker and the

person at whom the speaker is looking. Independent claim 18 has claim limitations such as a position calculator for determining the position of the speaker and the position of the object at which the speaker is looking; and a camera selector for selecting image data from the received image data on the basis of the determined position of the speaker and object at which speaker is looking. Independent claim 19 has claim limitations such as a step of determining the position of the speaker and the position of the person at whom the speaker is looking; and a camera selection step of selecting image data on the basis of the determined positions of the speaker and the person at whom the speaker is looking. Independent claim 39 has claim limitations such as step of determining the position of the speaker and the position of the object at which the speaker is looking; and a camera selection step of selecting image data on the basis of the determined positions of the speaker and the object at which the speaker is looking. Independent claim 40 has claim limitations such as means for determining the position of the speaker and the position of the person at whom the speaker is looking; and camera selection means for selecting image data from the received image data on the basis of the determined positions of the speaker and the person at whom the speaker is looking. Independent claim 41 has claim limitations such as means for determining the position of the speaker and the position of the object at which the speaker is looking; and camera selection means for selecting image data from the received image data on the basis of the determined positions of the speaker and the object at which the speaker is looking. For the above reasons independent claims 1, 18-19, 39-41, and their dependent claims 2-17, 20-38, 42-45, are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

--(JP403301976A) to Kawahara discloses method to automatically track a speaker, which can easily change positions and the number of microphones, without limiting the number of conference participants by detecting light emission through a television camera and storing a light emitting position as a speaker position based on the rotational angle of the television camera in the case of the detection.

--(JP404297196A) to Katumata discloses system in which cameras 1-1... 1-n are installed by adjusting the direction, the zoom and focus, etc., so as to photograph each different person (conference participants which are taking seats provided in prescribed positions). Microphones 2-1 ... 2-n are provided so as to correspond to each of these cameras 1-1 ... 1-n. A voice detecting part 4 detects a voice from a sound signal outputted by each microphone 2-1 ... 2-n. A switching control part 5 controls video selecting part 3 so as to select a video signal outputted by the camera corresponding to microphone whose voice is detected by the voice detecting part 4.
